

# Mamook GTX Men

fire-black

Art. nr.

3010-00420

The lightest crampon compatible mountain shoe for technically demanding climbing. This lightweight made from abrasion resistant Microfibre Racing and Dropstop textile provides great flexibility and has strong lateral support, thanks to integrated Mammut® Motion Control. Cushioning Hybrid Shell supports exactly and only where necessary. Asymmetric lacing takes the anatomy of the foot into consideration and means more pressure and precision on your big toes. The waterproof GORE-TEX® Insulated Comfort Footwear membrane, the very grippy Vibram® Teton sole with carbon insole, the situationally-individually adjustable 3 Zone Lacing system and the cushioning memo foam around the tongue and ankle, complete this quality shoe.
