OrthoLite®
comfort from the inside

Vibram®

GORE-TEX®

A backpacking shoe made from high-cut Nubuk leather and very abrasion resistant Dropstop textile is also outstandingly suited to via ferrata. Asymmetric lacing takes the anatomy of the foot into consideration and means more pressure and precision on your big toes. Thanks to the integrated Mammut® Motion Control, it has strong lateral support, without reducing lateral flexibility. The waterproof Gore-Tex® Performance Comfort Footwear membrane, the grippy Vibram® Mulaz sole with Climbing Zone and the cushioning memo foam around the tongue and ankle, complete this quality shoe.
